SAFETY  
CANADA

# Energy Safety Canada

We live and breathe safety so Canada's oil and gas industry can live and work safely. With roots dating back to 1949, Energy Safety Canada (ESC) was created by industry for industry with the sole purpose of improving safety throughout Canada's oil and gas industry.

As the hub for safety, ESC creates ready-made resources to help keep workers safe, reduce unnecessary costs and, ultimately, improve safety performance.

## What ESC offers

### TRAINING

With over 180 Authorized Training Providers across the nation and many online options, it's easy for workers to find the course they need anywhere, anytime.

Accepted at Canadian oil and gas work sites.

Developed alongside industry and frequently reviewed and updated.

### CERTIFICATE OF RECOGNITION

ESC is the Certifying Partner for Canada's oil and gas industry.

The only Certifying Partner that offers a single streamlined audit across the provinces and territories, saving time and money.

Access to over 200 certified health and safety auditors.

### KNOWLEDGE HUB

A one-stop-shop for safety expertise and tools to support improved safety performance.

Industry-leading publications, webinars and conferences.

### COMPANY SUPPORT

Improve safety performance through customized safety support, advice and resources.

Quickly and easily access leading and lagging industry data.

## Safety in Action

ENERGY  
SAFETY  
CANADA

### ENERGY WORKERS

Each year, ESC and its network deliver safety training to over 100,000 workers. We're proud to help ensure those workers get home safely every day.

ESC has a long history of supporting every sector in the energy industry: oilsands; geophysical; drilling; exploration; large, small and mid-sized producers; pipelines; and services.

### ENERGY SECTOR

### EXPANSIVE NETWORK

ESC's network expands across the nation with offices in Fort St. John, Nisku, Calgary and Weyburn; over 200 auditors; more than 400 instructors; and nearly 200 Authorized Training Providers, making it easier for workers and companies to get the safety support they need.

ESC partners with a broad range of stakeholders to improve safety in Canada's energy industry. This collaborative approach to injury and incident prevention benefits workers and companies by making it easier for workers to move from site to site, driving complexity and costs out of the system and, most importantly, improving safety outcomes.
